**Comment** There is a serious problem with the hilly part of Fortune Drive in the Walnut Creek subdivision. (This is near 106th and Cumberland.) The land under the road must not be stable and solid because slabs of concrete have sunk making the seams between slabs very bumpy. Some of the worst slabs have been replaced over the last few years, but new areas keep appearing. We need for the budget to include funds to do a major rebuild of many parts of the road. Currently, the main problem is the east/ west portion near Andrews Place. Thanks in advance for your consideration of this project.

**Comment** The streets of Walnut Creek, especially Fortune Dr, are in dire need of a rebuild. The streets have large potholes and sunken areas that have been repaired time and time again with little to no effect. The asphalt patches do not last and the street is unpleasant to drive on and loud for the neighbors living along it. This street is used as a cut-through to adjacent neighborhoods and is also part of the daily bus route for students. It becomes an icy mess during the winter because the snow cannot be plowed properly with the uneven street surface.

Please rebuild Walnut Creek streets as part of the 2024 budget.

| <b>Comment:</b>  | <p>The roads in my neighborhood -- Walnut Creek -- need to be replaced. They are a nuisance to drivers and a safety hazard to walkers, runners, bicyclists, and skateboarders. The roads include Fortune Dr, Andrew's Place, and Claymount Lane. A walk along the roads, in particular Fortune Drive, reveals uneven panels, numerous cracks, and the city's attempts to put temporary patches over the problems -- by putting asphalt on top of the concrete.</p> <p>This effort is needed, but is expensive enough that it will need to be planned for in the 2024 budget. Thank you for your attention in this matter.</p> |
